**Protective Operations Supervisor Training** is an intensive 1-day course designed for security managers, team leaders, and anyone responsible for personnel assigned to protective services.

This fully loaded professional supervisor's course is unlike any training currently available in the industry. POST aims to expand leadership knowledge, skills, and abilities for the real-world and help develop supervisory personnel for increased responsibilities. Course subject matter includes leadership principles, maximizing your people, organizing operations, best practices for scheduling, day-to-day management & quality control, 360-degree communications, documentation and reporting, performance evaluations, progressive discipline, common battles & mitigation strategies, managing special events, crisis management, and scenario-based exercises.

Few rise to excellence in the field of protective services, and even fewer are destined for management. This course will prepare today's leaders for tomorrow's challenges.

## PREREQUISITE

Must be employed by approved organization and current or prospective team leader, manager, or supervisor of security personnel.

All applicants must be approved to register.

PLEASE GIVE US A CALL
